

Municipal Stormwater Assistance Program

Our Experts Can Help Meet Your Community's MS4 Compliance and Community Outreach Needs!

The Partnership for the Delaware Estuary (PDE) is an environmental nonprofit organization with over 28 years of experience in addressing clean water issues. Our team of engagement professionals can help you tackle your municipality's stormwater issues and positively impact your community's water quality and that of the Delaware River and Bay. Working together, we can develop and provide high-quality outreach materials, trainings, and programs that support your community's needs and permit compliance.

Activities and topics could include:

- Developing interpretive signs for best management practice (BMP) demonstration sites and general stormwater pollution prevention education.
- Hosting workshops and programs to educate the public and enable them to take action at home to positively affect water quality and stormwater runoff.
- Conducting dog waste reduction outreach campaigns encouraging proper disposal to improve communities and help reduce harmful bacteria from entering waterways.
- Leading environmental art contests that engage community members in the importance of clean water, stormwater management, and litter prevention.

- Installing native plant pollinator gardens to improve habitat for local wildlife.
- Administering storm drain marking programs designed to educate residents about the importance of keeping pollutants from entering storm drains.
- Coordinating hands-on volunteer opportunities like community clean-ups that engage residents in conservation actions.

Activity costs are scalable from \$12,000 to \$150,000 annually. Learn how our programs can engage your residents and help you meet your community's unique stormwater and MS4 needs by contacting JHarrod@DelawareEstuary.org to discuss program availability, scheduling, and a budget that meets your needs.

Have something else in mind?

Collaborate with PDE on your creative MS4 community outreach ideas, and we can make it a reality.

"When I think back at all of the wonderful years the city has been in collaboration with the Partnership for the Delaware Estuary, I am astonished with all of the imaginative projects we have accomplished. For 15 years, PDE has provided creative and powerful projects and programs to help the city educate our community. Their staff is reliable and responsive. They always complete projects in a timely manner, and I would personally recommend them."

Alison Quimby, Manager of Sustainability and Environmental Compliance
City of Wilmington, Delaware - Public Works
